Eagle Eye

The Eagle Eye stands out as our most advanced standalone modular CCTV security pole. This system boasts an 8MP 25x zoom PTZ camera, offering 360-degree views of your site. In addition to the standard built-in solar panel, lithium battery, charge controller, 4G router, WiFi, and blue and red flashing lights upon intrusion, serving as the ultimate site deterrent and visual surveillance in the security industry.

Equipped with an automatic pole extension powered by an electronic linear drive, the Eagle Eye can extend the pole from 2.9m to an impressive height of 4.3m.

Receive notifications of on-site movements easily through app notifications and emails sent directly to you. Arm, disarm, and monitor all site activity remotely from your phone.
